Relational Riding *A Universal Foundation*

In this new DVD, ARIA certified instructor Michelle Binder utilizes a multi-disciplinary approach to riding and training that teaches concepts critical to the proper training of any horse. Unique camera angles and visual effects are combined with both live teaching segments, exercises and interesting voice-overs designed to educate and to help you think, ride and train in a new way. Whether you ride hunters, jumpers or an eventer, important concepts like the rein aids, balance, straightness, “in front of the leg,” and more provide the foundation you need to get into your fences safely AND with style!

“This training helped me help my event horse ease into the fences with better balance. Now we hit our spots so I feel safer and much more confident in myself and my horse!”

- Ashton Ross, Seattle, WA

“An amazing fundamental explanation of the biomechanics of the horse that could benefit all riders and trainers.”

- Janis M. Linnan, FEI Eventing Judge
